

The new Inpro IoT Fluid & Inprocloud: The seamless IoT solution

Level sensor with flow meter connected to the cloud for **remote and local monitoring** of product level and consumption

Kit IoT Fluid 02: For remote and local monitoring

Remote and local monitoring of stored fluid level and consumption. Includes display for local viewing

- ✓ Suitable for fuel – Oil, Kerosene, Waste Oil, etc... for water: consult
- ✓ Ensure continued supply, optimising delivery, and monitor fuel burner oil usage
- ✓ Remote spot and continuous inventory measurement, 24/7 monitoring.
- ✓ Programmable alarm threshold
- ✓ With local display for tank volume, total consumed fuel volume and acoustic overfill alarm with reset.
 - [1x EDM level probe, display, analog output and 2 relays output](#)
 - [1x VZO 4 Flow meter with reed pulser \(Diesel\)](#)
 - [1x MULTICOM c/w 230VAC power](#)
 - [1x SIM card with 500 MB data](#)
 - 5 Years Inprocloud access

About Inpro

Inpro R&D, founded in 1972, with more than 50,000 facilities operating in more than 30 countries. It is a European leader in the manufacture, design and supply of measurement and control systems for fuel transfer in heating, emergency power systems and critical and back-up infrastructures.

Since 2017 Inpro R&D has become the first company to develop IOT solutions for fuel transfer.
